

ECC006 Homework 2

Answer to Question 4

a) What is the URL of the site?

<https://github.com>

b) What is the purpose of the site?

GitHub is a platform for hosting and managing code projects. It allows developers to collaborate, track changes, and publish code using Git version control. It also supports GitHub Pages, where users can host personal websites for free.

c) Who is the intended audience?

The site is designed for programmers, developers, software engineers, and anyone learning to code.

d) Do you think that the site reaches its intended audience? Why or why not?

Yes, GitHub is extremely popular and widely used by both beginners and professionals. Its tools and community features make it a central place for developers around the world.

e) Is the site useful to you? Why or why not?

Yes, GitHub is very useful for me as a web development student. It helps me keep track of my code, host my personal website, and practice using version control. It also makes it easy to share my work with teachers and friends.

f) Does this site appeal to you? Why or why not? Consider the use of color, images, multimedia, organization, and ease of navigation.

Yes, I like the clean and modern look. The design is simple with a dark and light mode. It doesn't use many images, but it is well-organized and easy to use. I especially like how I can see changes in my code visually.

g) Would you encourage others to visit this site? Why or why not?

Yes, I would recommend GitHub to anyone learning to code. It's free to use, easy to get started with, and very powerful for collaboration and hosting.

h) How could this site be improved?

Some features may feel confusing for new users. They could add more beginner-friendly tutorials or guided steps when creating a repository for the first time.
