

## ECC006 Homework 4

1. Which type of CSS is coded in the body of the web page as an attribute of an HTML tag?  
b. inline
2. Which of the following is the CSS property used to set the background color of a web page?  
b. background-color
3. Which of the following describe two components of CSS rules?  
a. selectors and declarations
4. Which of the following associates a web page with an external style sheet?  
c. <link rel="stylesheet" href="style.css">
5. Which of the following configures a background color of #00CED1 for a web page using CSS?  
a. body { background-color: #00CED1; }
6. Find the Error – Why won't the following page display properly in a browser?

Error: The second <style> tag is never closed. There are two opening <style> tags and no closing </style> tag.

Fix:

```
<style>
```

```
body {
```

```
background-color: #000066;
```

```
color: #CCCCCC;
```

```
font-family: Arial, sans-serif;
```

```
font-size: 1.2em;
```

```
}
```

```
</style>
```

Having two <style> tags and no closing one breaks the HTML structure. Only one <style> section is needed, and it must be closed correctly.
